

I am a dedicated listener and financial supporter of the radio station Klove based out of California, through the substation in Cincinnati, Ohio FM 104.3. This radio station serves the community of Cincinnati with positive and encouraging music that is so desperately needed for this area. I believe that this radio station provides a service to the community that we simply cannot do without. It provides an escape for those who may be dealing with difficult situations and need to talk with someone. It supports traditional marriage and gives their listeners the opportunity to feel confident about taking a stand against other worldly views when we appreciate our faith and are willing to take a stand behind it. If this radio station is taken off the air, or moved to an LPFM the residents in the City of Cincinnati and other cities around the US will be missing out on the opportunity to hear what might just be their only hope in this world today. Please listen to the concerns we have regarding this attempt to keep our station on FM frequencies and allow this very powerful station to remain the most uplifting part of my day! Thank you so much for taking the time to read and respond to my comment.
